Flash Coin is a stablecoin built on the BEP20 (BSC) network.

It is designed to provide fast, secure, and low-cost transactions.

Backed by USD to maintain value stability, Flash Coin leverages Binance

Smart Chain

to deliver top-notch performance for global users.

Key Features:

- Transparency: All transactions are recorded on the blockchain and fully

verifiable.

- Speed: Fast transaction processing thanks to BSC's infrastructure.

- Low Fees: Minimal transaction fees make it ideal for micro and bulk

transfers.
